- **BlueMagic Group** (Istanbul hair-transplant clinic selling into UK/EU; 35,000+ patients, 120 countries): built AI UGC testimonial ads across four distinct angles, with macro product-demo sequences and a dual-CTA end card backed by Trustpilot social proof. **9.8% CTR reported on Meta.**

AI Producer & Content Automation Lead - Echo (contract)

Sep 2026 - Present | Remote

- Built the production system behind a live app's content operation: ~3,450 lines of Python running a build, generate, QC, compose and publish pipeline. **Shipped 35 AI-generated videos end to end** for a page with 11.3K followers.
- Built three custom AI agent skills, each data-grounded: a voice profile mined from **64 transcripts and ~51,000 words**; a hook generator producing distinct archetypes so every post tests a different lever; and a script-refresh agent that freezes teaching points so hook A/B tests stay clean.
- Automated QC (Whisper transcript diffing, brand-safety frame checks), Telegram human-in-the-loop approval, and **Meta Graph API scheduled publishing** so a seven-day calendar uploads once and publishes itself.
- Analysed **182 reels** of first-party data to identify top posting windows (median 31,834 views against 12,466 in the weakest).
